 Three games, three bets, three wins

A Round of Two Halves

Well, just like the girl in the Longfellow poem, when the Heritage and Line Funds are good, they're very, very good, and when they're bad, they're horrid. This weekend, they were truly very, very good.

Here's the detail:

Heritage Fu	nd	ROI	59.4%	
	Bet*	Price	Net Return*	
Carlton	2.29%	\$2.15	(2.3%)	Lost by 100 pts
Fremantle	3.12%	\$1.87	(3.1%)	Lost by 26 pts
Richmond	7.46%	\$2.75	13.1%	Won by 49 pts
Total	12.9%		7.6%	
	Bet*	Price	Net Return*	
Carlton	7,79%	\$1.90	(7.8%)	Lost by 92.5 pts
Essendon	2.98%	\$1.74	(3.0%)	Lost by 24.5 pts
Richmond	7.79%	\$1.90	7.0%	Won by 62.5 pts
KICIIIIOIIU	7.79%	\$1.90	7.0%	Won by 34.5 pts
Collingwood			3.3%	

So, somewhat remarkably given last weekend's carnage, all Investors make a profit on the round, as you can see from the following chart:

Performance of Each Strategy to End of Round 12

Or, to describe Investors' positions more numerically and more completely:

I mentioned in the previous newsletter that the Tigers owed us. Well, as the following team-by-team, Fund-by-Fund view shows, they've made the first down-payment on the debt. Indeed, they've now the best record of any team for us on Line Betting, and their Heritage Fund record is now simply bad, not appalling.

So, adding the 12a and 12b results together, that makes 4 profitable rounds in succession for the Line Fund, and three in a row for the Heritage Fund. Long may it continue.

• Amongst the leaders, only MM16 scores

MM16's Bravery is Rewarded

Only 5 tipsters registered a score this weekend, and none managed more than a single correct tip. MM16 was the sole correct tipper in the Tigers v Demons clash, and CTL and a handful of MM strategies called right in tipping the Pies over the Swans. Otherwise, nil points all round.

Here's the detail:

So, Chi finds himself 4 tips off the pace again, and Quila trails by another 5.

Smug Monkeys

Neither Chi nor MM16 made ground on the Monkeys in Round 12, with both of them now registering just small single digits on the M10 measure.

M10 Scores for Chi and MM16 After Round 12

It's fairly sobering when you think about what this chart means. MM16 has so far tipped at 62% across 96 games of football, yet there's a 10% or better chance that, amongst a troupe of 7 monkeys who wouldn't know Christie Malthouse from Jane Goodall, at least one of them would have done at least as well as MM16.

The Alternative Premierships

Geelong continues to dominate most of the Alternative Premierships, leading in six of them, coming 4th in one, and 5th in the other.

Looking first at the End of Quarter Premierships:

- Geelong leads all 4 Premierships, having led at 9 or 10 of the changes in its 12 games
- Richmond have led at halftime on 5 occasions, but have only converted this to points twice
- No team has led at the first change on fewer than 4 occasions, most have led on at least 5 occasions.

Melbourne	16	75.0	Melbourne	8	65.8	Melbourne	8	69.7	Richmond	6	77.0

Turning next to the During the Quarter Premierships:

- Carlton have won only one final term all season and that was way back in Round 1.
- Melbourne, despite having won only 2 games this season, have won 6 and drawn 2 of their 12 final terms.
- Hawthorn and Essendon have by far the best final term records: the Hawks have won 9, drawn 1 and lost 2, and the Dons have won 9 and lost 3 of their 12 final terms.

Appendix Tipping Model Strategies

Strategy Name	Basis for Tips
Chi Tipping Model (CTM)	Complex statistical model incorporating a range of factors.
Quila Tipping Model (QTM)	Uses an approach similar to that used for the CTM.
Bookies Know Best (BKB)	For each game, tips the TAB Sportsbet favourite. In the case of equal favourites, it tips the true home team or, if there's no true home team, tips the team with the higher ladder position (ties are broken using percentage then for-and-against margin).
Consult The Ladder (CTL)	Tips the team with the higher ladder position (ties are broken using percentage then for-and-against margin). For the first round of the season, use the ladder position at the end of the previous regular season.
Momentum Matters (MMx)	A series of strategies that involve building competition ladders based only on the results of the most recent x rounds of regular season games (drawing on games from the previous season if required).
	The MM2 strategy considers only the last 2 regular season rounds, the MM4 strategy only the last 4 rounds, and so on. Once a ladder has been built for a strategy, the selected team is that with the superior ladder position (as per CTL above).
	This year we'll track the performance of MM2, MM4, MM6, MM8, MM11, MM16 and MM22.
No Independent Thought (NIT)	Tips the team that is most popular amongst all other strategies.

Notional Initial Funds

For reasons that are somewhat technical (I'm happy to provide details to anyone who's interested but, broadly, it allows me to describe bets in terms of a common percentage for all Investors and still maintain the same share price for all Investors), I need to calculate what I call "Notional Initial Funds". It's calculated separately for each Fund.

For original Investors, the definition is straightforward:

Notional Initial Funds = Actual Funds Invested

For Investors who join the Fund post Round 1:

Notional Initial Funds = Actual Funds Invested / Share Price at the time of investing

(in other words, it's the notional amount that would need to have been invested at the start of the season in order to have returned an amount equal to the amount actually invested).
