

MAFL Funds: Season 2007

Where Statistics Meets Leather and Grass

1 July 2007

Season 2007, Number 13.1

In this Edition of the newsletter:

- Results of wagers and tips for Round 13
- Monkey Update
- Winning the Tight Ones
- The Alternative Premierships

Errata:

Due to a cut-and-paste error, this page in Thursday's Newsletter showed us with a small bet on Fremantle (mirroring what we'd had on Freo in Round 12). Unfortunately, we had no such bet in this round (as page 2 and the Ready Reckoner reflected).

At a price of \$1.22, it wouldn't have made much difference, but apologies for any false elation nonetheless.

 Three wins from four bets as the Beta Fund looks to turn the corner and the Line Fund continues its winning ways.

Beta Fund Answers The Critics

When you've only a 6 point margin spanning the entirety of the results that will make two bets that you have on the same game profitable, and when a team goals in the last six seconds to produce exactly such a result, I guess you have to acknowledge that you may have been the beneficiary of something very close to luck.

Duly acknowledged. Surely, though, the Beta Fund deserved a break.

Actually, it could have been an even better weekend had the Tigers stayed just a little closer to the Saints on Saturday night. Their eventual loss by 17 points meant that they fell only 9 points short of prevailing on line betting and, as it turned out, of giving us the perfect weekend.

Never mind - I'll settle for 3 wins from 4 bets most weekends.

Here's the detail:

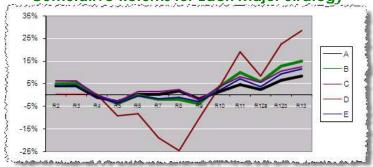

Results of Round 13 Wagers

	Bet*	Price	Net Return*	
Essendon	5.91%	\$1.55	3.3%	Won by 2 pts
Total	5.9%		3.3%	
	Bet*	Price	Net Return*	
	Bet*		Net Return*	
	7.78%	\$1.90	7.0%	Won by 5.5 pts
Melbourne	l			
Melbourne Richmond	7.78%	\$1.90	(7.8%)	Lost by 8.5 pts
	7.78% 7.78%	\$1.90 \$1.90	(7.8%) 7.0%	Lost by 8.5 pts Won by 29.5 pt

So, the Beta Fund favourite jinx is broken, at least for now, as it makes only its second successful bet of the season, and the Line Fund extends its record of consecutive profitable rounds to five.

Here's the detail in charts and numbers:

So, with the Dons' last-gasp victory, the Beta Fund finally has a team with whom it's had a season-wide profitable relationship.

Melbourne's win on Line Betting continues the Line Fund's extraordinary record with the Dees: the Dees are only 6 and 4 this year when receiving start, but the Line Fund has managed to pick two-thirds (4 of 6) of those wins while only stumbling over one one-quarter (1 of 4) of the losses.

(The Line Fund's record on Carlton is even more impressive, however: the Line Fund has benefited from 3 of the 4 Carlton wins with start and tripped up on just 1 of the 8 losses).

Geelong still stands alone as the only team that no Fund has wagered on this season.

Everyone Bags a Hatful

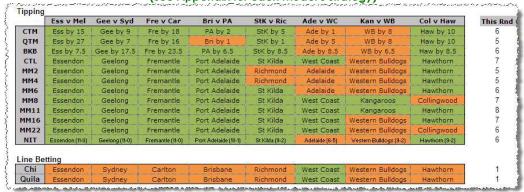

Our tipsters were very much on the money this weekend, averaging 6.2 correct tips out of eight, which is comfortably the best result of the season. MM11 produced only the second perfect round of the season (Chi's was the other, in Round 8), propelling it to equal 4th on the tipsters' ladder, just 2 tips behind Chi. The Kangaroos' victory over the Bulldogs was the only result that might be deemed an upset by the bulk of our tipping panel, as only 2 tipsters correctly predicted this result. The only other result that produced relatively widespread disappointment was the Eagles' victory over Adelaide: only five tipsters correctly predicted this result.

Such high levels of tipping proficiency have produced little significant movement on the tipsters' ladder, though Chi has dropped a tip further back from MM16, and MM16 has regained the outright lead over BKB as result of 2 favourites going down this week.

 MM11 tips the card, MM16 bags 7, and Chi and BKB each score 6. Here's the detail:

Results of Tips from all the Tipping Models

(see Appendix for each Model's strategy)

(Chi's and Quila's 1 from 8 on Line Betting represents their worst performance all year, and comes on the back of a poor Round 12 leaving them at just 51 from 104 and 47 from 104 respectively. Stick to the Line Fund, I reckon.)

Cumulatively, here's where the various tipsters are at:

Cumulative Tipping Results After Round 13

	Cum	% Correct	Av Pred Err
MM16	66.5	63.9%	-
ВКВ	65.5	63.0%	26.99
CTM	61.5	59.1%	27.62
MM8	59.5	57.2%	-
MM11	59.5	57.2%	-
MM4	58.5	56.3%	-
MM6	56.5	54.3%	-
MM22	56.5	54.3%	-
NIT	56.5	54.3%	-
QTM	55.5	53.4%	29.06
CTL	55.5	53.4%	-
MM2	48.5	46.6%	-

Surely, you'd think, Chi's 6 from 8 this week will have put some space between him and the Monkeys.

Monkeys Slip Slightly

This week's results illustrate just how difficult it is to tip at a level that's demonstrably better than chance.

Round-by-Round M10 Scores

Chi's 6 from 8 was only enough to add one monkey to his M10 score, moving it from 2 and 3. MM16's 7 from 8 made a slightly bigger difference, adding 20 monkeys to its M10 score, lifting it to 27. Still, that's not a lot of monkeys given a 64% accuracy level.

Winning the Tight Ones

It's something of a cliché that champion teams tend to win close games. With that thought in mind and with the relatively small margins of victory recorded in a few games this weekend, I thought it'd be interesting to look at the performance of all the teams so far this season in close games.

Margins of Victory and Defeat

/~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~									
	W1-11	Draw	L1-11	W	D	L			
Adelaide	1	0	2	7	0	6			
Brisbane Lions	0	1	1	4	1	8			
Carlton	2	0	0	4	0	9			
Collingwood	2	0	1	8	0	5			
Essendon	5	0	1	8	0	5			
Fremantle	1	0	2	6	0	7			
Geelong	1	0	1	10	0	3			
Hawthorn	2	0	1	9	0	4			
Kangaroos	1	0	1	8	0	5			
Melbourne	0	0	4	2	0	11			
Port Adelaide	2	0	0	8	0	5			
Richmond	0	1	2	1	1	11			
St Kilda	0	0	0	6	0	7			
Sydney	1	0	2	6	0	7			
West Coast	1	0	1	9	0	4			
Western Bulldogs	1	0	1	7	0	6			

This table is, I'd suggest, worthy of a few minutes review. Let me point out a few things that leap out for me:

- Almost one half of Essendon's games (viz, 6) have been decided by less than 2 goals. Remarkably, it's won 5 of those 6 games, these 5 representing over 60% of its wins for the season.
- In contrast, Melbourne have played in 4 games that have been decided by less than 2 goals and has contrived to lose all four of them.
- Only Carlton and Port Adelaide have perfect records in games won by less than two goals. Both have 2 and 0 records, though the 2 wins represent half of Carlton's but only a quarter of Port's.
- St Kilda have not played in a single game where the final margin has been less than 2 goals. Indeed, though not shown in this table, 10 of their games have been decided by 4 goals or more 4 in their favour, and 6 against the highest number of any team.

The Alternative Premierships

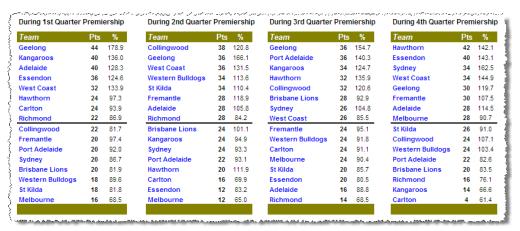

Geelong coast-to-coast victory over the Swans has allowed it to retain leadership of all four End of Quarter Premierships.

Team 💮 💮	Pts	%	Team	Pts	%	Team	Pts	%	Team	Pts	%
Geelong	44	178.9	Geelong	42	172.6	Geelong	44	166.6	Geelong	40	153
Cangaroos	40	136.0	West Coast	38	132.8	West Coast	40	114.6	Hawthorn	36	121
Adelaide	40	128.3	Kangaroos	36	114.3	Kangaroos	36	117.3	West Coast	36	121
ssendon	36	124.6	Adelaide	34	117.0	Hawthorn	32	114.9	Collingwood	32	106
Vest Coast	32	133.9	Hawthorn	32	104.7	Collingwood	30	105.7	Essendon	32	103
lawthorn	24	97.3	Fremantle	26	106.3	Adelaide	28	106.7	Port Adelaide	32	100
Carlton	24	93.9	Essendon	26	100.2	Port Adelaide	28	106.0	Kangaroos	32	99.
Richmond	22	86.9	Collingwood	26	99.0	Western Bulldogs	28	96.6	Adelaide	28	108
Collingwood	22	81.7	Western Bulldogs	24	98.9	Fremantle	24	102.0	Western Bulldogs	28	98.
remantle	20	97.4	Port Adelaide	24	92.6	Sydney	24	93.9	Sydney	24	107
Port Adelaide	20	92.0	Sydney	24	89.5	St Kilda	24	91.0	Fremantle	24	103
Sydney	20	86.7	Richmond	24	85.6	Brisbane Lions	20	91.5	St Kilda	24	91.
Brisbane Lions	20	81.9	St Kilda	20	93.9	Essendon	16	93.1	Brisbane Lions	18	89.
Vestern Bulldogs	18	89.6	Brisbane Lions	16	90.8	Carlton	16	85.0	Carlton	16	78.
St Kilda	18	81.8	Carlton	16	81.9	Richmond	14	79.3	Melbourne	8	77.
Melbourne	16	68.5	Melbourne	8	66.8	Melbourne	12	73.5	Richmond	6	78.

The variability in Essendon's performances at the end of each quarter is quite extraordinary: they're 4th based on End of Q1 performance, 7th based on half-time scores, 13th based on End of Q3 performances, and 5th on the ladder.

Carlton, meantime should be lobbying the league to shorten all matches to a single quarter. They're 7th based on End of Q1 performances and 14th or 15th on performances at the end of all other quarters.

Turning next to the within-quarter performances, Collingwood stands out as the team that starts and ends poorly: they're 9th on Q1 performances, 1st on Q2, 5th on Q3, and 10th on Q4. So good are they, however, in the middle quarters that they've won 8 of their 13 matches and lie 4th on the ladder.

The Kangaroos are another team with highly variable performance levels across the quarters. They're 2nd on Q1 performances, 10th on Q2, 3rd on Q3, and 15th on Q4. Like Collingwood though, they've not suffered for such variability: they've had 8 wins and sit at 7th on the ladder.

For Adelaide, it's Q3 that's been their downfall this season (as, indeed, it was this weekend). They've won only 4 third quarters this season on their way to 7 wins and a precarious grip on a spot in the eight.

Richmond, however, find the entire second half to be a problem. They're 8th in terms of Q1 and Q2 performances, but 16th and 14th in terms of Q3 and Q4 performances respectively.

Sydney's problem is slow starts. They're 12^{th} on Q1 performances, 11^{th} on Q2, 7^{th} on Q3 and 3^{rd} on Q4. Too often though they've left themselves too much to do in the final term, which is why they're now 10^{th} on the ladder.

Tipping Model Strategies

Strategy Name	Basis for Tips
Chi Tipping Model (CTM)	Complex statistical model incorporating a range of factors.
Quila Tipping Model (QTM)	Uses an approach similar to that used for the CTM.
Bookies Know Best (BKB)	For each game, tips the TAB Sportsbet favourite. In the case of equal favourites, it tips the true home team or, if there's no true home team, tips the team with the higher ladder position (ties are broken using percentage then for-and-against margin).
Consult The Ladder (CTL)	Tips the team with the higher ladder position (ties are broken using percentage then for-and-against margin). For the first round of the season, use the ladder position at the end of the previous regular season.
Momentum Matters (MMx)	A series of strategies that involve building competition ladders based only on the results of the most recent x rounds of regular season games (drawing on games from the previous season if required).
	The MM2 strategy considers only the last 2 regular season rounds, the MM4 strategy only the last 4 rounds, and so on. Once a ladder has been built for a strategy, the selected team is that with the superior ladder position (as per CTL above).
	This year we'll track the performance of MM2, MM4, MM6, MM8, MM11, MM16 and MM22.
No Independent Thought (NIT)	Tips the team that is most popular amongst all other strategies.

Notional Initial Funds

For reasons that are somewhat technical (I'm happy to provide details to anyone who's interested but, broadly, it allows me to describe bets in terms of a common percentage for all Investors and still maintain the same share price for all Investors), I need to calculate what I call "Notional Initial Funds". It's calculated separately for each Fund.

For original Investors, the definition is straightforward:

Notional Initial Funds = Actual Funds Invested

For Investors who join the Fund post Round 1:

Notional Initial Funds = Actual Funds Invested / Share Price at the time of investing

(in other words, it's the notional amount that would need to have been invested at the start of the season in order to have returned an amount equal to the amount actually invested).
